NRC (National Research Council). 2006. Fluoride in Drinking Water: A Scientific Review of EPA's Standards. Washington, DC: The National Academies Press. [Available at to read online for free at: <http://www.nap.edu/catalog/11571.html>]

Selected Quotes

FLUORIDE'S EFFECTS ON THE BRAIN:

"On the basis of information largely derived from histological, chemical, and molecular studies, it is apparent that fluorides have the ability to interfere with the functions of the brain and the body by direct and indirect means." p187

"Fluorides also increase the production of free radicals in the brain through several different biological pathways. These changes have a bearing on the possibility that fluorides act to increase the risk of developing **Alzheimer's disease**." p186

"The possibility has been raised by the studies conducted in China that fluoride can lower intellectual abilities." p187

"Studies of populations exposed to different concentrations of fluoride should be undertaken
